## RECIPROCATING SAW ACCESSORIES

The Reciprotool from P&N is a simple to use system designed to fit all leading brand reciprocating saws, to convert them into a multitool that can not only cut but also scrape, file, sand, brush or scour.

Simply secure the universal quick-connect adapter into your saw just like a standard reciprocating saw blade. You can then attach any one of 10 interchangeable heads.

With the Reciprotool fitted to your saw, you can:

- File wood, metal and plastics
- Remove ceramic tile, tile grout, linoleum, rubber backed carpet and glued underlay from floors
- Deburr steel and soft metal pipes
- Brush and scrape loose paint
- Remove rust and corrosion
- Scrub carpet, floor mats and tires
- Clean tile, linoleum, fibreglass, concrete, brick, wood cladding and most hard surfaces

The accessories have a hex-shank connection so that the user can operate the head in six different orientations, enabling access to areas where other tools may not reach.

## SPEAR & JACKSON HAMMERS

Spear & Jackson have released a comprehensive range of new and improved hammers, including claw, club, ball and cross pein hammers, sledges and mallets.

The new claw hammers are available with wooden, fibreglass and two styles of steel handles, in weights from 16oz to 24oz (454-680g).

The all steel hammers offer ideal balance with durability. The head and shaft are fully polished and the dual material soft style grip is mechanically pinned to the hammer shaft.

For the professional or the serious DIY user, the premium choice is the forged I-beam hammer. It features a perfectly balanced forged I beam construction with an oversized strike area. Integral to the head design is a magnetic nail starter to leave one hand free if required.

## STRINGED INSTRUMENTS

Stan Ceglinski from Billinudgel Woodworks has been busy making bespoke stringed musical instruments with crazy sounding names like HoldenCaster, BMW-Caster, cigar box guitar and diddy bows, all loosely based on the designs of guitars and ukuleles.

All of these instruments are made with the highest quality hardware and strings available. The timbers used come from Billinudgel Woodworks' extensive range of beautifully coloured and figured Australian timbers.

Lessons on playing your new instrument are available on site, if required. The lesson can be quick or if you have

the time, 'all day and night'. Enthusiasm for these serious instruments is claimed to be catchy and addictive.

## KUNOS COUNTER TOP OIL

Used extensively by award winning craftsmen, Kunos Counter Top Oil #243 is certified as a food safe product (European Standard DIN EN 71) and may be used on a variety of timber surfaces including toys and food preparation areas. It has the added benefit of preventing heat below 50°C (eg. the bottom of tea cups) from causing discolouration on light timbers.

The transparent oil product combines natural waxes and resins to create a lustrous, open-pored and water resistant surface finish after 2-3 applications. When required, the finish can be repaired or rejuvenated with ease.

Kunos Counter Oil consists of linseed oil, stand oil, natural resin ester, orange oil,
