

Planes. These are used to form grooves to start Hollows and Rounds so that they can make unique simple or complex mouldings for furniture or boxmaking.

Like all HNT Gordon planes, these tools have been designed to be simple to set up and use.

For more details on the operation of these planes, visit www.hntgordon.com.au and click on Moulding Planes.

UPHOLSTERY NAIL STRIPS

Padgham Upholstery stock a range of high quality German-made nail strips, imported directly from Heico.

The metal strips are very flexible, able to curve around corners or bend at right angles if required. Apart from a variety of upholstery applications they also have uses on items such as rocking horses.

Two new additions to the range are Old Copper Renaissance 11mm and Brass 11mm.

TINTED GAP-FILLING EPOXY

Boatcraft has released two new tinted versions of its popular Epox-E-Glue. The product has been formulated to meet the requirements of woodworkers seeking a gap-filling thixotropic (won't sag) paste glue coloured to suit the timbers they are working with.

Currently the tinted Epox-E-Glue comes in two colours — Pine (suits most common Pine species such as Hoop Pine) and Cedar (in a darker reddish colour to blend with dark-coloured timbers).

Mix the two components of Epox-E-Glue in equal volumes and apply to one side of a clean and recently sanded joint. The joint should have been recently sanded to remove extractives that may bleed to the surface and interfere with the glue bond.

The joint does not need to be clamped and if the mating surfaces are not perfect, the Epox-E-Glue will fill the gaps. The glue will adhere tenaciously to most timbers and will develop 90% of its strength overnight at average working temperatures.

Epox-E-Glue is available in 200g, 600g, 1kg and larger packs.

MAINTENANCE OIL

Livos Australia has introduced an easy to use maintenance oil suitable for keeping an attractive sheen on interior wooden floors and furniture.

Kunos Floor Maintenance #1862 comes ready for use. Simply apply a small amount of the oil to the surface to refresh the finish and provide a transparent satin gloss sheen.

The #1862 is very economical to use with one litre covering approximately 160m². The oil comes in 250ml and 2.5 litre containers.

As with all Livos products, it is made from all natural ingredients and a full declaration of the ingredients is available from the website, www.livos.com.au.

EDGE-BANDING ADHESIVE

Henkel's DORUS KS 250 COOL represents the next generation of edgebanding technology.

Unlike other adhesives that require

application temperatures of up to 210°C, DORUS KS 250 COOL can be applied at just 140-160°C. It is claimed that this helps to avoid cracking, can reduce energy costs by up to 70% and reduces VOS (Volatile Organic Solvents) emissions.

The cooler application temperature also means faster setting time, cleaner processing, less stringing, lower maintenance and easier trimming. Its coating weight reduction of up to 40% offers further cost savings.

Henkel's DORUS KS 250 COOL is available from Häfele Australia which has warehouses in all capital cities.

KNIFE HANDLE TIMBER

In response to customer demand, Misan Craftwood has introduced a selection of knife handle blanks in Tasmanian and mainland timbers.

The timber is selected for consistency, colour, patterning and grain. Pairs of blanks are taken from the same piece of timber and bookmatched where possible.

The handle blanks are custom cut to customer's requirements (minimum thickness is 5mm).

Varieties available include Myrtle (inc. burl, figured and tiger grain), Huon Pine (inc. birds eye), Blackwood (inc. fiddleback), Sassafras (inc. blackheart and spalted), Native Olive, Musk, Jarrah (inc. figured and black stripe), Camphor Laurel, Cheesewood and WA Sheoak.

An example of pricing is \$11 plus postage for a pair of handle blanks, 150mm x 50mm x 6mm.
