

The Natural Bedding Company

Nobody does it better than nature ...

The Natural Bedding company manufactures strong and long lasting natural timber bed frames, with beautiful rich grains, along with natural and sustainable mattresses.

At The Natural Bedding Company we have been working with Natural Fibres to manufacture Natural Mattress and Natural Timber bed frames. These products are not only handmade (reducing energy consumption and increasing quality control) from natural fibres giving you a healthy sleeping environment. They are also very long lasting, 5 times longer than conventional mattresses and bases. This means you're saving money, having a healthier sleep, and helping your environment by purchasing and using low impact products.

Our timber frames are made from Australian Hardwood sourced from ITC's "Good Wood", AFS certified sustainably managed forests. ITC recognises

and need for environmental accountability, 'Good Woods' certificate of authenticity gives you assurance that you have purchased a product manufactured from certified timber, that has been legally grown, harvested, and manufactured to the highest standards and with minimum impact on the environment.

In choosing The Natural Bedding Company products you made a positive contribution to the environment, support local Australian businesses and help preserve our world for future generations to enjoy.

Our products offer piece of mind for anyone looking for quality, natural and healthier option. Timber frames starting from \$500 and Natural Mattresses starting from \$705.
