

DIGITAL SHOWER TIMERS

RIPPLE

www.rippleproducts.com

We're all aware that lengthy showers waste litres of precious water. Ripple digital shower timers provide a practical reminder to help reduce your daily water consumption. With a timer, clock and a beeping alarm to notify you if you're over-indulging, you can drastically reduce your water wastage. Make a real difference by providing a positive example of efficiency that will drip through to friends and family members alike. Made from recycled packaging materials, Ripple digital shower timers are 100% waterproof, steam proof and shatter proof and come with batteries included. You can check out the full Ripple range at www.rippleproducts.com

LIVOS FLOOR COATINGS

LIVOS

www.livos.com.au

Livos has created a range of natural resin coating oils using sustainable substances which impregnate and protect surfaces from within, rather than creating a top-lying plastic coating. These plant based non-toxic products are biologically degradable and created from renewable raw materials. Livos floors and furniture hardening oils are suitable for most porous surfaces including concrete, cork and timber and are available in a wide range of stains that intensify natural grain and colour. Unlike synthetic equivalents, the oil-resin wax is free from harmful chemicals and unpleasant odours. Livos coatings not only rejuvenate the lustre and strength of furniture and floors but also protect the health of individuals and the environment.

DRAFTSTOPPA® TOPHAT™ CEILING EXHAUST FAN

ADVANTEC

www.draftstoppa.com.au

Designed and manufactured in Australia, the DraftStoppa® TopHat™ self-sealing exhaust fan has been custom-designed to maximise air-flow while minimising energy usage and reducing noise. The fan body provides easy termination for ductwork, while the VorTecs™ grille assists air-flow by imparting a vortex motion which, in conjunction with the unique blade design, moves a minimum of 200m³ (at outlet of 3mtr duct) per hour. By preventing hot, cold or polluted air (or vermin!) from entering the home via the exhaust fan, the DraftStoppa® TopHat™ self-sealing exhaust fan is the quietest, most efficient way to save up to 30% on your home energy bills.
