

Technical Data Sheet

SVALOS Thinner No. 222

Suitable for LIVOS wood stains, varnishes, resin oil impregnations, LIVOS clear and covering laquers. For brushing on resin-rich woods before priming. For cleaning of equipment.

Technical qualities Clear, colorless, with a mild odour. Low surface tension, does promote penetration into the micro-capillary system of wood, cork, etc. Solvent retention in dried coating is almost zero. A light odor of orange oil will be present for a while.

Full declaration Isoaliphates and orange oil.

Application method Add SVALOS Thinner No. 222 slowly, while stirring constantly.

Coverage Depending on the intended purpose: For spray application, 5 to 10% , as a rule, to dilute LINUS Wood & Cotto Oil No. 260 dilute up to 50 % (e.g. for priming).

Specific gravity Approximately 0.78 g/ml

Flashpoint Over 61°C VbF A III.

Safety advice Provide enough ventilation after application.

R 43 May cause sensitisation by skin contact.

R 51/53 Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

R 65 Harmful: May cause lung damage if swallowed.

S 2 Keep out of the reach of children.

S 23 Do not breathe fumes.

S 24 Avoid contact with skin.

S 62 If swallowed, do not induce vomiting: seek medical advice immediately and show this container or label.

For viscosity adjustment: Excessively diluted stains and paints tend to “run” on vertical surfaces. Especially in spray application of colored paints, viscosity should be kept high in order to prevent the flotation of pigments. “Solvent shock” may occur by diluting too much or too quickly i.e. pigments become separated from the binding agent. Excessive thinning of KALDET Transparent Wood Stain No. 270, for example, produces marked spots of pigment concentration on the treated surface.

Contains limonene.

Disposal According to locally regulated laws.

Container sizes 0.5 lt; 1 lt; 5 lt

Storage Cool and dry.
