Available Australia wide, see website for nearest outlet.

July 2018

With the year flying by the colder months have been keeping us nice and busy. There have been a number of expos and trade nights which Livos has been proud to exhibit and take part in all over Victoria with some interstate visits coming up. The next months will see more interstate visits to Tasmania, Sydney and the ACT. We have been pleased to hear from clients and their completion of some amazing projects which we will be featuring. So if you have something to share we would love to hear from you so please [let us know any feedback.](#)

Kindest regards *Angela Petruzzi*

Lake Tahune Hut- Tasmania

What a dramatic backdrop for the new Lake Tahune hut. The new 8 star passive solar building designed by Green Designs and constructed by prefab specialists Valley Workshop replaced the original one earlier this year. Due to the terrain, prefabrication was off site and all flown in by helicopter during the summer. A complex design, balancing hikers needs with minimal footprint to the environment. To save precious time the SIP (Structural Insulated Panels) for floor, walls and roof were oiled with Kunos off site, saving precious time. Beautiful photos by Chris Crerar.

WOOD DUST

Wood Dust Exhibition

Livos Australia will have a stall at Wood Dust, the international timber and woodworking festival, held at a number of venues across Queanbeyan and Bungendore from the 17th to 21st of October. Come say hi and view some amazing works by some of the most amazingly talented timber craftsman! Please [click here](#) for more information.

Product information

For all products, whether natural like Livos or synthetic, it is imperative that the preparation, application as well as maintenance instructions are followed. This is the only way to keep anything from a bench top, floor, deck or painted walls and everything in-between in an optimal condition. We have simple to follow how to sheets, videos as well as care and maintenance and rejuvenation sheets available on our web site. Please download or ask your retailer for a copy.

Line marking and Livos oils

We've had a number of enquiries in regard to using the Livos oils with line markings for sports courts. Through our experience we have been very successful with the procedure of having the line painted directly on to the completed sanded floor. Then allowing sufficient time for the paint to dry thoroughly. Prior to oiling, if dusty, one should go over the surface with a white pad (no oil). Then, using the usual methods, apply the oils over the top of the lines.

ASBB Environmental Health Conference

The Australasian Society of Building Biologists is holding a conference where you can listen to the latest information from medical and environmental health professionals on how buildings in which we live, study and work can affect our health. You can also learn simple and effective strategies to minimize your exposure to health hazards in the built environment and support your wellbeing and browse the expo for a wide range of healthy home products recommended by building biologists. Please [click here](#) for more information and to view speakers.

Client Feedback

It's always lovely to hear feedback from clients, and we can't help but share!

"Thanks for participating in the rejuvenation of our house. It has been a pleasure to work with you and your team, and we will be recommending your services to our friends. I was very happy with the thoroughness of the work the boys did in taking care to cover everything with consistency. The levelling and finish is of a high standard, and we are grateful for the effort the boys did to get the best result this neglected floor could offer.

I am very happy we went with your team, and chose Livos products."

Fin & Claire

Country Spread

Living in the country may seem charming and idyllic to some, but Pamela O'Reilly endured many climatic extremes before building a modern farmhouse near Margaret River. Timber flooring finished with the Ardvos Universal oil. To read the article please [click here](#).

Closer to Eden

Rather than being bulldozed, this striking and ambitious yet badly performing house in Adelaide's Eden Hills has been reconfigured and extended to provide better flow and connect it to its bush setting. Decking oiled with the Alis decking oil. To read more please [click here](#).
