Handi Home

Modular building

Quicksmart Homes has launched its innovative Quickshack - a freestanding modular solution that is ideal for granny flats, rural accommodation, a teenage retreat, home office, residential villa or for retirement living, priced at \$85,000 [box-only]. The cleverly designed, contemporary two-bedroom, self-contained buildings are made using the latest steel fabrication technology. Robust, and quick to install and connect, they come fully fitted out inside and ready for roof, cladding and deck additions.

The Quickshack comes as a water-tight 'box only', but to give customers a helping hand with visualising their finished home, the Quickshack website lets you play with different options and finishes. It allows you to see what your Quickshack would look like with different roof styling and cladding. It also lets you place your Quickshack in a surrounding that reflects your situation. It's your own builders who provide the cladding and roof, so it gives you a better idea of what you want, allowing your builder to get a firm quotation from Quickshack.

The fully fitted-out Quickshack includes a ready-to-move-in kitchen, dining and living space, bathroom, master- and second-bedroom. The kitchen features a quartz stone benchtop and an integrated cooker/oven; while bamboo flooring and skirting is provided throughout the main living and bedroom areas. There are plenty of power points, recessed down lights and data/TV points.

Natural decking oil

Livos Australia offers a 100% natural range of eco-friendly paints, oils, stains and cleaning products. Their products are biologically degradable, sustainable and harmless, even in direct contact with humans, animals and plants. The Livos Alis decking oils can spruce up tired decks, without posing any harm to the plants and animals who are sharing the space. They are water repellent, open pored and fast drying and may be used as an initial treatment or for maintenance. Available in a range of colours to complement all timbers and styles, it will not crack, peel or blister therefore no sanding is required for rejuvenation. It is easy to maintain and rejuvenate using the same product for a natural and beautiful finish that will not harm you, your plants or the environment.
