SMALL RADIUS SPOKESHAVE

HNT Gordon have produced a very small radius curved sole spokeshave after many years of requests from luthiers and furniture makers.

This shave is 235mm long x 12mm wide x 12mm high. It weighs 90g and is fitted with a 19mm wide x 1.2mm thick x 24mm long tool steel or HSS blade. It has a 60° blade angle for planing. The all-brass sole has a radius of 9.5mm (3/8").

The spokeshave is designed for the shaping and fine finishing of very tight inside curves — the kind that you find in lutherie and furniture making. It can also be used for flats and outside curves and any combination thereof.

FOLDING RETRACTABLE KNIFE

Designed for convenience and durability, the Stanley FatMax Folding Retractable Knife folds down to a compact size when not in use. The blade retracts effortlessly with the push of a button.

Other features of the knife include an integrated string cutter and soft grip handle.

COMPRESSOR LUBRICANT

Amsoil PC Series Oil for air compressors has been specially formulated to provide low friction properties that increase operating efficiency and resist viscosity

increase due to oxidation.

The high quality 100% synthetic oil incorporates thermally stable Polyalphaolefin (PAO) synthetics fortified with non-detergent ashless additives for maximum protection at high temperatures and pressures.

Amsoil distributor, Enginicare Systems, claims the oil lasts up to eight times longer than petroleum-based oils, reducing maintenance and waste oil disposal costs.

WOOD/LEATHER BURNER

The latest single and dual pen versions of the ND1 Pyro-Pen offer two burning ranges, one for wood and one for leather.

Because leather is a much softer medium than wood, it requires a lower heat setting. The new burners offer five leather settings and five wood settings, giving a total of 10 settings to work with. The lower leather settings can, of course, be used for soft burning and special shading effects on wood.

Made by Pyrographic Equipment Manufacturing and covered by a two year written warranty, the burners are available from selected stockists.

GONG MOVEMENTS

International Timepieces are selling two 8-day mechanical movements that are a copy of the old American gong movements produced around the late 1800s and early 1900s. Made in India, the new movements will fit into Ansonia and Sessions clock cases as replacement units.

There are two models available, both supplied with hands, pendulum, gong and key. The first is for a kitchen clock that requires a 9 1/4" (235mm) long pendulum. The second movement has a short rear pendulum as used in the American black mantle clocks.

Plans are available for making a copy of the Ansonia 'King Clock', Ansonia 'Triumph Kitchen Clock' and the Sessions 'Ursula' black mantle clock. International Timepieces also stock the clock decorations required such as the Lady Head, Lion Head, Half Pillars and Column Holder.

The movements with accessories retails for \$130 each and the plans are \$25 each.

LIQUID BEESWAX

LIVOS Gleivo Liquid Beeswax #315 is suitable for refreshing waxed timber as well as cork and stone surfaces. It is also suitable for the regular care of linoleum.

Because the wax is in liquid form, application is simple and very economical. It can be applied as a very thin coat by brushing, spraying or with a wadded cloth. When completely dry, it produces a silky gloss finish. If preferred, it may be coloured using 10% Vindo natural oil paint.

LIVOS Gleivo Liquid Beeswax is made from natural ingredients — a full declaration of ingredients is available from the web site, www.livos.com.au.
