

#### Livos- our story

*At Livos we genuinely believe your home should not only be a place where you can go to relax and feel comfortable, it also needs to be safe for you and your loved ones to live a long, happy and healthy life.*

*Unfortunately many people are unknowingly living in a potentially toxic environment because typically their walls and floors have been painted or stained with harmful chemicals.*

*After working extensively in the coatings industry in Switzerland, Angela and Robert relocated to Australia bringing with them a new prospective on health issues caused by many synthetic products.*

*In 2000 Angela and Robert established 'Anro Floorcare' a specialist floor sanding service using only safe and natural finishes. Fuelled by their passion to educate people about the hidden health risks associated with many commonly used paints and stains, in 2006 they jumped at the chance to take over the Australia wide distributorship of the country's premier ecofriendly range of products - Livos.*

*Livos Australia is committed to making your home, workplace and the environment healthier and safer for everyone and minimising people's exposure to harmful toxins found in traditional synthetic paints and finishes.*

*Today Livos Australia is proud to offer the fully declared, natural, safe range of eco friendly paints and stains to all Australians.*

*Livos is the safest natural option.*
